Say goodbye to starvation diets forever...
Results are so unbelievable that we are offering a **FREE TRIAL** of the Weight Loss Accelerator™.

Doctor Developed, Doctor Tested, and Doctor Endorsed!

"I've never been this excited about anything in the weight loss industry...as I am with the AdvantRx™."

Jan McBarron, M.D.
Co-host of "Duke and the Doctor"
Nationally Syndicated Radio Program
Board Certified Bariatric Medicine

"I helped develop the AdvantRx™ system because I was frustrated by the lack of weight loss products and systems that really work for my patients. The results of the clinical test show that AdvantRx™ works."

John L. Zenk, M.D.
Medical Director,
Minnesota Applied Research Center
Board Certified Internal Medicine

Dieters Dilemma

Scientists have been studying for decades, new ways to increase the body's natural ability to burn fat. The active ingredient in AdvantRx is a powerful, natural metabolite of the human hormone DHEA. It has been shown to have biological activity that can accelerate weight loss 200% faster than diet and exercise alone.

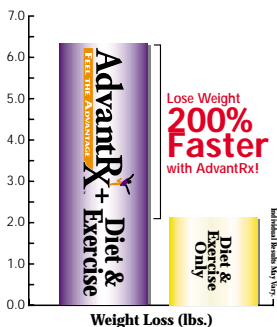

Many people just can't seem to lose weight. They try fad diets, and exercise exhaustively but just can't seem to lose weight. In one of the AdvantRx clinical studies, participants were required to be physically active 6 months prior to the study and unable to lose weight. The results were stunning! AdvantRx combined with a sensible eating and exercise plan worked!

Scientific Breakthrough

Results of the study showed that participants lost up to 13 lbs of body weight over an 8 week period. On average, over 80% of the weight that was lost was body fat. In another study, participants also found over 80% of the weight loss was fat.

The results of these two studies have been linked to thermogenesis; the body's natural defense to burn fat calories. Thermogenesis is a process of oxidizing (burning) body fat for energy. As we age, thermogenesis can decline because the body begins to produce less and less of this powerful metabolite. AdvantRx simply puts back what Mother Nature takes away. Many of today's fashionable weight loss products claim to stimulate your metabolism, but are merely stimulants with no proven clinical studies and they can produce adverse side effects.

"I recommend AdvantRx to my patients because the active ingredient is clinically tested, effective, and a natural way to accelerate weight loss," according to Dr. Jan McBarron, co-host of the nationally syndicated radio show Duke and the Doctor."

Clinical Studies Prove Accelerated Weight Loss for Men and Women!

Each eight week study included overweight, but otherwise healthy participants with both males and females. The average age of the participants was 44.5. Each participant was required to exercise 180 minutes per week and followed an 1,800 calorie per day diet. The AdvantRx group received the Weight Loss Accelerator and the other group

received a placebo (inactive) pill. The results of the study indicated a statistically significant decrease in body weight in the AdvantRx group over the placebo group. This decrease in body weight was 200% faster than in the placebo group.

"Eat More, Exercise Less, Get Results!"

After reading how the clinical trials worked for women, I decided to try AdvantRx myself.

I found that I ate more and exercised less than any other systems, plus I didn't have the cravings for my favorite "cheat" foods. It's easy, it's fast, and the results are incredible. And because it's doctor developed, I trust it completely. Now I've been recommending AdvantRx to all my friends who want to lose weight.

Thanks AdvantRx!
Don Walstrom

Unique results. Your results will vary.

When you order your **FREE SAMPLE** of the Weight Loss Accelerator, ask about the complete AdvantRx Weight Loss System. It's the same system used in the clinical studies to accelerate weight loss. It contains a 52-page Eating and Exercise Plan with easy-to-do exercises designed to maximize the burning of fat; a 30-day supply of the Weight Loss Accelerator; and a **SPECIAL BONUS** Motivational Audio Cassette.
